Winter Sunshine

TO REALLY ENJOY SKIING in the Rockies one must get up into the high altitudes, where the heavier snow falls, the wind, sun and more constant temperature, have a much better chance to form on the snow's surface the ideal powder snow condition. Nowhere does this hold more true than on the immediate eastern crest of the Continental Divide, upon which, after exhaustive search, was found the ideal ski terrain, and the location for SUNSHINE LODGE.

Situated only 14 miles from Banff, and its parent hostelry, the MOUNT ROYAL HOTEL, from which daily passenger service is provided by sight-seeing motor car, SUNSHINE is now readily accessible to all skiers visiting the Canadian Rockies, and affords the utmost in comfort and the opportunity to enjoy the finest sport.

The centre of a vast terrain, above timberline with a base altitude of 7200 feet, and wide open slopes running up to 10,000 feet on some of the surrounding peaks, Sunshine offers unexcelled skiing, to the beginner and expert alike. Nursery slopes and sparsely wooded runs surround the lodge and graduate into an unlimited expanse of timber free snow fields, providing downhill runs miles in length, up to 2000 vertical feet, all converging at the lodge door.

Modern rope ski-tow 1500 feet long, immediately adjacent to the Lodge.

A competent staff of instructors trained in local mountain conditions is always available to guests.

Two-way radio communication is maintained with Banff, for making reservations, relaying of important messages and other emergencies.
